

Keep your olive and specialty oils

Fresh and Vital
MUCH LONGER
in

VIOLIV™ vitality glassware™

- Preserves and enhances all organic goods!
- Delays rancidity
- Protects from light damage

All organic matter begins to degrade immediately after harvest from light and air exposure. Oils you purchase are already deteriorating in the store, packaged in toxic plastic or light-sensitive glass packaging. Violiv glassware preserves and enhances the innate vitality of your oils through bio-photonic interaction. It filters out all damaging light, while allowing penetration of beneficial UV(a) and FarIR (Far infrared) rays to preserve, retain, and stimulate natural vitality.
